

Team Red Top

Michael Curran, *President & CEO*

Michael oversees company operations including finance, legal, contracts, project management, information technology, and human resources. He forges new business opportunities and maintains close working relationships with general contractors and established clients.

Mark Lanpher, *Director of Construction Services*

Mark oversees all Project Management and Estimating functions. He leads overall efforts to procure, estimate, design, propose and manage construction projects. He administers quality control and construction schedules across company-wide projects.

Gene Anunciacion, *Senior Estimator*

Gene oversees estimating for all electrical contracting projects. He prepares cost estimates for materials, labor and equipment. He consults with engineers, architects, owners, contractors and subcontractors to ensure the appropriate materials and equipment are properly specified and priced.

**Dennis Anchondo,
Rob Walker**
Project Managers

Each of our project managers plans, organizes, and supervises project execution. Along with the General Superintendent and General Foreman, they schedule the field workforce and monitor daily construction to ensure each project is on schedule and within budget. They work

They work closely with our CAD department, Estimators, and Purchasing to coordinate project materials, solve project related issues and administer change order requests.

Robert Swan
Division Manager / Special Projects

Robert oversees the Services and Special Projects functions. He dispatches and manages electricians to customers that need emergency services, 24x7, 365 days a year. He is also in charge of managing projects, scheduling workforce and monitoring construction for projects smaller than \$150K.
